

October 2021

A new partnership between SITI B&T, Ancora and TCP Tecnocenter Polska

*To strengthen its presence in Poland, the Group has signed
an agreement with one of the most accredited national retailers*

Ancora

The **SITI B&T and Ancora** (a group company specialized in the production of machines for finishing ceramic tiles) development project continues thanks to the new partnership signed with **TCP Tecnocenter Polska**, which further consolidates the presence of the group from Formigine in Europe.

The agreement with TCP Tecnocenter reinforces commercial and service coverage in a very dynamic market. Poland is in fact in sixteenth place among the ceramic producing countries on the international scene, with a production in 2020 of 132 million square metres and an increase of 5.6% compared to the previous year. Eighth world exporter, the Polish sector sells 43.9% of national production abroad, equal to 58 million square metres, with an increase of 16% on 2019, for a value of 361 million Euro.

TCP Tecnocenter Polska, one of the most accredited Polish dealers for ceramic supplies with more than 15 years of experience in the market, has therefore chosen to make its facilities available to the SITI B&T and Ancora teams in order to jointly develop a new commercial strategy and new technical, after sales and spare parts services.

A work involving continuous **innovation and research** not just in a technological key but also in terms of services is in fact the ongoing activity that drives the Formigine Group companies. **In-time and qualified assistance** is the **common value** that has shaped the collaboration between **SITI B&T, Ancora and TCP Tecnocenter Polska.**

SITI-B&T Group

SITI-B&T Group, listed on the AIM Italia market since March 2016, a supplier of technology and complete plants serving the world ceramics, tiles, and sanitaryware industry, with a capillary presence in all markets worldwide and the industry's most complete range of technologies, offers solutions of excellence and innovative services, with particular attention to issues of energy efficiency and environmental respect. It guarantees complete and personalized services, from the study of the finished product design through to the turnkey manufacture, including the maintenance and modernization of production lines. SITI-B&T Group operates through the following operating units: "Tile" (complete plants for tiles), **Projecta Engineering** (digital printers), **Digital Design** (design and graphic projects), **Ancora** (lines for the surface finishing of ceramic products), **Diatex** (cutting discs and squaring tools) and "**B&T White**" (complete systems for sanitaryware), "**B&T Quartz**" (complete lines for agglomerated quartz surfaces). In 2019, SITI-B&T Group recorded a sales volume of 175 million euros, with an export share of 90% and investments in R&D for 7 million euros.
